The C&A Source Guide attempts to list every crane, access, telehandler and ancillary equipment manufacturer in our industry, detailing the specific models they offer within each category of products. It has been a big undertaking to collate such a large amount of data and it is possible that the odd error or omission has occurred. If you spot anything that needs changing, please do not hesitate to email us at: editor@vertikal.net.

### PUSHING THE LIMITS OF

# productivity

The **Snorkel S3010P** is a mini push-around scissor lift that provides a safe work at height solution for low level projects, and offers significant productivity benefits over traditional low-level access methods such as ladders or scaffolding towers. Designed to withstand the demands of construction sites, the Snorkel S3010P can lift up to 240kg (430 lbs.) to a working height of 5.0m (15 ft. 10 in.). Plus, it can pass through a standard doorway, and it is easy to use and simple to maintain.
