# Best Platformers' yet?

The 15th Platformers' Days event was held in September this year and thanks to excellent weather and a positive attitude it was one of the best so far.

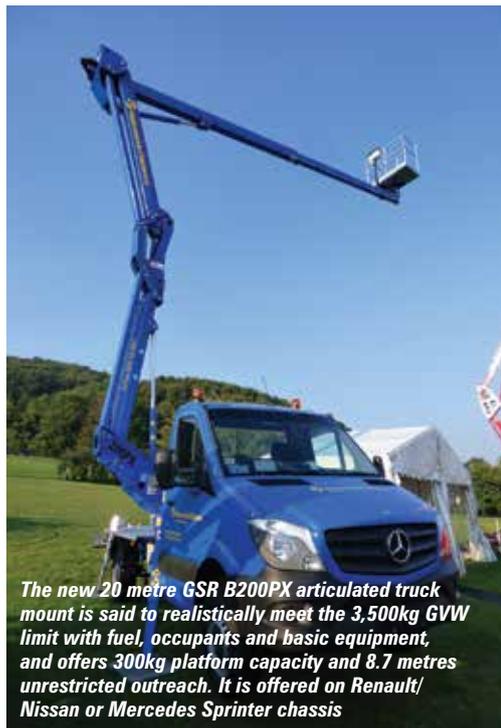

In terms of new products truck mounted lifts were out in front, but another significant difference this year was the increase in the number of mini/spider crane and telehandler exhibitors, not to mention a good selection of glass handling robots. Visitor attendance at around 1,500 was a new record and there was plenty to see. Here is just a small overview of some of the new products on show.

*Oil&Steel unveiled a new distribution policy for Germany and three new products, including the 21metre Scorpion 2112J and 23 metre Scorpion 2313 with 12 and 13 metres of outreach respectively*

*Ruthmann unveiled two new telescopic truck mounted lifts - the 36 metre T360 on a 15 tonne two axle chassis with up to 31 metres of outreach, 350kg platform capacity and its new cockpit control station and the 17 metre T170 aimed at utility and local authority work*

*The new 20 metre GSR B200PX articulated truck mount is said to realistically meet the 3,500kg GVW limit with fuel, occupants and basic equipment, and offers 300kg platform capacity and 8.7 metres unrestricted outreach. It is offered on Renault/ Nissan or Mercedes Sprinter chassis*

*Aluminium crane maker Klaas showed a new truck mounted lift, the 25 metre Theo 25 mounted on a 3.5 tonne chassis with 250kg platform capacity and up to 17 metres outreach*

*Platformers' Days saw the launch of Ahern Deutschland to distribute Snorkel platformers and Xtreme telehandlers in Germany*

*The event was also the formal launch of Dinolift's new 60ft Dino 220XSE heavy-duty boom lift with extra-large work platform and fork attachment*

*The Manitou Man'Go 12 launched earlier this year*

Hematec was out in force with its top-end mast booms such as this Helix 1508

The Denka comeback is gathering pace in Germany where it is sold alongside TCA Falcons

Isoli truck mounts alongside Omme spiders and Airo booms and scissors

Luffing and offset jibs were the main feature on most spider lift stands

A Custers tracked boom lift
